DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. §102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 35 and 36 are rejected under 35 U.S.C. §102(b) as being clearly anticipated by Landry (WO 99/61209).

Landry (figures 1, 2, 4) teaches a device for tightening a strap around freight comprising a body capable of being rotated in the form of the reel 110 and comprising a means to hold the strap in the form of a slot and a first head extending from each end of the reel 110 that is received in corresponding slots of the torsion arm 126; and a clamp 102 coupled to the body by frame 104 for holding a second end of the strap and comprising two clamp arms 158, 146 wherein arm 158 is rotatably coupled to the clamp.

Allowable Subject Matter

Claims 37 and 38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
